In addition to analytical and quantitative abilities, a theory of intelligence must take account of peoples creative abilities - their ability to go beyond given information and imagine new and exciting ways of reformulating old problems. It must also take into account peoples ability to weigh options carefully and act prudently. As he weaves his way through decades of important research on these questions, Sternberg develops a vision of human intelligence that is far more nuanced and accurate than anything previously offered. *Wisdom, Intelligence, and Creativity Synthesized* is essential reading for psychologists, cognitive scientists, educators, and organizational researchers. Robert J. Sternberg is Dean of the School of Arts and Sciences and Professor of Psychology at Tufts University. Prior to being at Tufts, he was IBM Professor of Psychology and Education, Professor of Management in the School of Management, and Director of the Center for the Psychology of Abilities, Competencies, and Expertise at Yale University. Author of over 1, 100 articles, chapters, and books, Sternbergs research focuses on intelligence,...
