

## Revue Celtique (12 )

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Original publisher: Hampton, Va. : National Aeronautics and Space Administration, Langley Research Center, 1984 OCLC Number: (OCoLC)231742963 Subject: Structural analysis (Engineering) Excerpt: . . . behavior the relationship between AE and ho depends on the current stress state  $\sigma$  relative to the yield surface and on the magnitude of the strain  $\epsilon$  increment. The relative positions of the stress state and the yield surface is determined from eqn. ( 3 ). For convenience in the flowchart, the first term, ieqn. ( 3 ) is defined to be the effective stress  $\sigma_{ef}$ . For an arbitrary stress state  $\sigma$ , the following relationships apply:  $\sigma_{ef}(\sigma)$  Oys stress state is inside yield surface  $\sigma_{ef}(\sigma)$  Oys stress state is on yield surface  $\sigma_{ef}(\sigma)$  Oys stress state is outside yield surface The first steps to calculate the final stress state  $\sigma_f$  assuming no additional yielding ( block I ). Block numbers are indicated at the upper left-hand corner of the blocks. If  $\sigma_{ef}(\sigma_f)$  Oys then  $\sigma_f$  is the correct stress state ( block 3A )....
